

Marathon Brand

Marathon brand gasoline is available through approximately 5,400 retail outlets in 19 states in the Midwest and Southeast.

Marathon brand retail outlets are owned and operated by independent entrepreneurs. In addition to quality MPC gasoline and diesel, these retail outlets offer a wide range of services including convenience store products, car washes and co-branded food products.

During 2015, Marathon brand retail outlets sold approximately 5.02 billion gallons of transportation fuels.

Wholesale Marketing

MPC is a large wholesale supplier of gasoline and distillate to resellers and consumer end-users within its market area. Independent retailers, unbranded jobbers, airlines, transportation companies, railroads, marine companies and utilities form the core of MPC's wholesale customer base. Light product sales are made at 61 company-owned and -operated, and 120 third-party terminals throughout 15 states.

Asphalt, Coke and Heavy Fuel Oil Marketing

MPC is one of the largest U.S. asphalt producers in terms of capacity. The company markets asphalt through 18 company-owned and -operated and two third-party terminals located throughout the Midwest and Southeast that are supplied by four of MPC's refineries (Garyville, Catlettsburg, Detroit and Canton).

The MPC customer base includes asphalt paving contractors, government entities (states, counties, cities and townships) and asphalt roofing shingle manufacturers.

MPC produces and markets heavy residual fuel oil or related components, including slurry, at all of our refineries. In addition, MPC produces fuel-grade coke at our Garyville, Detroit and Galveston Bay refineries, which is used for power generation and in miscellaneous industrial applications, and anode-grade coke at our Robinson refinery, which is used to make carbon anodes for the aluminum smelting industry.

Special Products Marketing

MPC is a producer and marketer of various feedstocks and specialty products. Product availability varies by refinery and includes platformate, alkylate, FCCU gas, naptha, dry gas, propylene, raffinate, butane, benzene, xylene, molton sulfur, cumene and toluene. These products are marketed domestically to customers in the chemical, agricultural and fuel-blending industries.
